

Acronyms and Definitions
Dept of Ecology
Port Townsend Paper Corporation
Air Operating Permit Public Meeting/Hearing
June 2, 2009

ASB:	Aerated Stabilization Basin (the ponds, wastewater treatment facility)
Agreed Order:	A legal document formalizing an agreement between Ecology and a regulated party for the actions needed at a facility
Ambient monitoring:	Monitoring of free-flowing air outside of buildings
Averaging period:	Time over which monitoring data is averaged
CAM:	Compliance Assurance Monitoring; established for 40 CFR 64 to provide reasonable assurance that facilities comply with emissions limitation by monitoring the operation and maintenance of their control devices
CFR:	Code of Federal Regulations
Consolidated Order:	A legal document that combines existing orders
Control device:	Treatment device added to an emission unit to control a pollutant
Criteria air pollutants:	Regulated under National Ambient Air Quality Standard provisions of clean air legislation: Particulate Matter (PM), Ozone, Carbon Monoxide (CO), Nitrous Oxides (NO _x), Sulfur Dioxide (SO ₂), Lead
Emission unit:	something that emits, or has the potential to produce, any pollutant regulated by the Clean Air Act
EPA:	United States Environmental Protection Agency
HAP:	Hazardous Air Pollutant; non-criteria pollutants deemed to be especially toxic and regulated under hazardous pollutant provisions of clean air legislation
MACT:	Maximum Achievable Control Technology – Maximum reduction requirements for a hazardous pollutant source considering cost and feasibility; standard that is not less than the average of the top 12% performing existing sources within a source category or utility
NCASI:	National Council for Air and Stream Improvement
ORCAA:	Olympic Region Clean Air Authority
PCHB:	Pollution Control Hearings Board
Residual Risk Assessment:	Qualitative and quantitative process that determine the relative harm associated with residual pollutant exposure; Requirement in 1990 amendments in Clean Air Act for EPA to determine the residual risk from HAPS after the implementation of the MACT standards.
RFO:	Reprocessed fuel oil
TRS:	Total Reduced Sulfur
